DIGITAL ASSETS SECURELY TRANSFERRED

Digital Asset Custody Services

Offer institutional custodial services of cryptocurrencies and tokenized assets, maintaining full control of private keys through a variety of wallet infrastructure configurations.

FLEXIBLE DEPLOYMENT MODELS

Offer institutional custodial services of cryptocurrencies and tokenized assets, maintaining full control of private keys through a variety of wallet infrastructure configurations.

MPC & HSM KEY MANAGEMENT

Fireblocks can provide hot, warm, and cold storage configurations leveraging MPC and HSM.

Tokenization

Issuance and end-to-end life cycle management of tokenized assets including tokenized deposits, stablecoins, and financial assets, i.e., equities, bonds, carbon credits, and non-financial assets such as art, real estate, and NFTs.

SECURELY MANAGE AND DEPLOY SMART CONTRACTS

Securely manage the full end-to-end token lifecycle utilizing the Fireblocks Policy Engine, creating role-based access and control policies for smart contracts and asset transfers.

TOKEN DISTRIBUTION WITHOUT MANUAL ERRORS

Connect with the buy & sell side on the Fireblocks network for primary and secondary distribution of tokens, and eliminate manual errors through deposit address authentication and whitelisting.

Blockchain-based Payments

Move to 24 / 7 / 365 settlement while creating full payment lifecycle transparency using direct-to-wallet acceptance and payouts for cryptocurrencies, stablecoins, and tokenized deposits for B2B and B2C customers.

INTRODUCE EFFICIENCY AND PREDICTABILITY INTO PAYMENT FLOWS

Fireblocks Payments Engine creates a transparent and reconcilable payment lifecycle, creating time and resource efficiencies.

CREATE CUSTOM WORKFLOWS

Generate operational flexibility through custom payment workflows that can be built into any step of the payment lifecycle.

Trading & Treasury Management

A single platform to manage digital assets across self custody, trading, and qualified custody wallets.

SINGLE INTERFACE FOR ALL INTERNAL WALLETS

Fireblocks offers a single, simple UI to manage all internal wallets as well as API connectivity to plug into existing treasury applications.

ROBUST GOVERNANCE AND WORKFLOW MANAGEMENT

Fireblocks Policy Engine allows you to create customizable user and role-based controls to prevent internal collusion and unauthorized access to customer funds.

Fireblocks Advisory Services

Work with proven financial markets and blockchain technology experts at Fireblocks to help build your digital asset roadmap and business plan.

TRUSTED BY THOUSANDS OF ORGANIZATIONS GLOBALLY
